1-Click Spin Up in Microsoft Azure Cloud
Faster Backups | Instant Recovery | RTPOs < 15 Minutes | Serverless Backup & DR Solution

Next Generation of On-Demand Cloud Backup & Disaster Recovery

Backup physical servers, Virtual Machines (VMs), hosts, applications, and ALL kinds of NAS and iSCSI workloads with Veeam backup and replication software and store backups in StoneFly cloud storage in Azure.

You can backup Windows and Linux physical servers in the cloud. Or you can create agent-less backups for VMs hosted on Hyper-V, VMware, Citrix (formerly XenServer), Nutanix Acropolis hypervisors.

With our enterprise cloud gateway, integrated with Veeam software, you can move all your backup copies to a secure, reliable, and cost effective Azure cloud. And directly spin up mission-critical workloads in Azure with a single click.

StoneFly Cloud Storage in Azure

1-Click VM Spin Up

StoneFly Cloud Gateway

veeAM
Backup & Replication Software

Get the Full Backup & DR Infrastructure Experience

Integrated data services optimize backup and disaster recovery and StoneFly's enterprise-grade storage in Azure delivers cost-effective and high performance storage.

If you're looking for the full backup and DR experience without the hardware, then StoneFly cloud storage in Azure is the obvious choice.

Integrated Backup & DR Features

Some notable features of our full package backup and DR solution:

Change Block Tracking (CBT)
Track changes and backup only the changed files.

Granular Backup & Recovery
Backup & recover select files instead of full volumes.

Agent-less Backups
Backup VMs and virtualized workloads without installing backup agents.

1-Click Spin Up in Azure
Spin up VMs directly in Azure cloud for instant recovery and reduced downtime.

VMware vCloud Backup
Backup and recover VMware vCloud workloads.

SureBackup™ and SureReplica™
Automatically check the integrity of backup and replication jobs.

StoneFly Azure Cloud Gateway Features

Key features of our cloud gateway to Microsoft Azure cloud:

STONEFLY

www.stonefly.com

Automated Tiered Storage
Define policies and automatically transfer data between cloud storage tiers.

Replication
Configure synchronous or asynchronous replication to Azure cloud.

Delta-Based Snapshots
Leverage change-based snapshots and always have a way to restore lost, corrupted, or encrypted data.

End-to-End Encryption
Secure data at rest and at transit with advanced encryption technology.

Centralized Management Web GUI
Manage all NAS and iSCSI backups in Azure cloud with a single web GUI.

Deduplication
Optimize backup data and control the cost of cloud backup with data deduplication.

No Complex Cost Structure or Hidden Costs - Get the Full Package

Instead of purchasing cloud storage, a backup software, and a gateway to connect the backup software with the cloud and dealing with complex cost structures, get everything in a single bundled package.

Our partnerships with Veeam and Microsoft Azure, and our innovative solutions enable us to combine all necessary cloud backup and disaster recovery components into one full package.

StoneFly package combines Veeam's licenses and our NAS and iSCSI storage in Microsoft Azure cloud. We also offer NAS-only, iSCSI-only, or a converged (NAS = iSCSI) licenses for our cloud storage in Azure.

We're also open to existing Veeam users. If you already have a license, then we can integrate our gateway technology and our storage in Azure with your Veeam license to give you the full serverless cloud backup and DR experience.
