

## Data Protection Features

- WORM Storage
- Air-Gapped Volumes
- Backup Vault
- Built-in Anti-Virus, Anti-Malware & Anti-Ransomware
- Immutable Snapshots
- Advanced Encryption
- NAS Backup
- Threat scan for dormant virus & ransomware

## Storage Optimization Features

- Deduplication
- Flash Cache SSD Caching
- Automated data tiering
- Data Integration
- Thin Provisioning

## Advanced Features

- Sync & Async Replication
- Appliance Mirroring
- Cloud Connect to Azure, AWS, S3 or StoneFly Private Cloud
- Real-time Graphical Performance Reporting

# StoneFly DR365

Backup & DR Appliance  
(DR Site in a Box)

## DR365 Solution Overview

The DR365 is a complete DR site in a box equipped with enterprise backup software, StoneFly storage OS (SCVM), and industry standard hypervisors such as VMware, Hyper-V, KVM, XenServer and StoneFly Persepolis.

The DR365 appliances enable users to configure backup & DR, run virtual workloads, integrate cloud repositories and set up reliable data protection and budget-friendly storage optimization features in a single all-purpose solution.

## DR365 Capabilities

- Run applications, databases, & other user VMs
- Backup & spin up VMs on DR365
- Store redundant copies in the cloud
- Back up other on-premises servers, SAN, NAS systems & virtual environments
- Scale out to petabytes of storage capacity easily

## Preconfigured with

- Backup Software
- StoneFly SCVM

Deployed on any of the following hypervisors:

- VMware
- Microsoft Hyper-V
- KVM
- Citrix or XenServer
- StoneFly Persepolis

4-bay tower to 36-bay rackmounts

Bring your own license – or buy licenses from StoneFly.
