

Smart Protect Co-Managed™ Services

Elevate Your Data Protection Strategy

Overview

Managing backup and disaster recovery tasks such as planning, configuration, testing, and monitoring can be both time-consuming and expensive. StoneFly's Smart Protect Co-Managed™ Services provide remote expertise to simplify these processes, offering tailored solutions on-demand or with a committed hourly basis per month.

By streamlining these critical tasks, organizations can enhance data resilience while saving valuable time and resources, enabling them to focus on core operations with confidence.

Key Features

Collaborative Planning

Strategic Partnership: Work alongside our experts to craft a customized backup and disaster recovery plan.

Advanced Analytics & Reporting

Data-Driven Decisions: Receive insightful reports to refine your data protection strategy.

Shared Responsibilities

Team Synergy: Combine the strengths of your internal team and our experts for a balanced approach to data protection.

Adaptability and Resilience

Continuous Optimization: Experience ongoing efforts to enhance the efficiency and effectiveness of your backup and DR systems, adapting to evolving business needs for maximum resilience.

Tiered Management Options

Smart Protect Flex™

- **Flexibility:** Tailored packages offering 2 to 10 hours per month for specific tasks.
- **Customer-Centric:** Execute tasks at times convenient for you.

Smart Protect Commit™

- **Consistency:** Fixed weekly hours ranging from 2-10 for regular tasks.
- **Task-Oriented:** Meet your weekly requirements reliably and effectively.

Professional Service

- **Project-Based:** One-time blocks of 2 to 10 hours for specialized projects.
- **Expert Assistance:** Ideal for targeted initiatives like testing, optimization, and training.

Smart Protect Co-Managed Services

- **Strategic Planning:** Align your data protection strategy with your business objectives.
- **Security Audit & Compliance:** Meet industry standards and regulatory requirements.
- **Configuration & Integration:** Seamless integration with your existing infrastructure.
- **Upgrade & Patch Services:** Stay updated with the latest security patches.
- **Disaster Recovery Procedures:** Plan for various security scenarios, including breaches and ransomware.

Why Choose Smart Protect Co-Managed Services

- **Cost Efficiency:** Specialized expertise without the high costs.
- **Expert Resources:** Immediate access to backup and disaster recovery specialists.
- **Operational Flexibility:** Choose which tasks are managed in-house and which are handled by us.
- **Compliance Assurance:** Stay compliant with industry standards.
- **Scalable Solutions:** Adapt to your organization's evolving needs.

- **Regular Testing & Ransomware Prevention:** Validate your backup and DR systems while preventing time-triggered, stealth, and dormant ransomware.
- **Proactive Monitoring:** Early identification and resolution of potential issues.
- **Continuous Optimization:** Ongoing efforts to enhance system efficiency and effectiveness.
